

DATA MANAGEMENT FOR RESEARCH IN A HEALTH CARE SETTING 20TH JULY 2017

The NHS R&D Forum has partnered with the Association of Clinical Data Management to deliver this master class for research management, support and leadership teams working in and for a health and care setting.

Ensuring high quality data in research is a key role for those working for NHS R&D sponsors and host organisations that are delivering clinical research, but who may not be the experts themselves.

COURSE STRUCTURE

This interactive and practical one-day workshop aims to provide an overview of processes and best practices for the successful delivery of clinical research data. The course will cover regulations, systems and processes with a blend of information and practical exercises.

WHO IS COURSE FOR?

All staff involved in the operational conduct or oversight of clinical research across NHS, academic and commercial research units including Data Managers, Study Monitors, Research Managers, Study Coordinators, Sponsor representatives and other site staff.

COURSE OBJECTIVES

- **To provide an overview of the clinical research process with a key focus on the management of research data, particularly in clinical trials.**
- **To provide an understanding of the regulatory framework with a key focus on data management systems and processes including key aspects of the ICH GCP R2 Addendum**
- **To identify what SOPs might be needed in a health and care setting**

- **To provide a comprehensive overview of data management systems and processes covering:**
 - a. Design and set up
 - b. Essential Documents
 - c. Data entry and Source Data Verification
 - d. Other sources of data
 - e. Data validation and effective management of queries
 - f. Documentation and audit trails
 - g. Term coding
 - h. Quality Control
 - i. Database lock processes

ABOUT THE TRAINER

The Association for Clinical Data Management (ACDM) was founded in 1987 and has a large, diverse membership. The association aims to lead the development and appreciation of the essential activities of the Clinical Data Management profession and represents and support professionals involved with managing clinical data from within the pharmaceutical, biotechnology and academic research fields. ACDM is an independent, non profit making organisation with an international perspective.

Jon Wood has a degree in physiology and brings nearly 30 years of industry experience across project management, biometrics and strategic sourcing roles within blue chip pharma and Contract Research Organisations. Jon has been an active contributor to the ACDM training committee for many years and is currently on the Board of Directors of the ACDM.

All NHS R&D Forum courses are supported by additional trainers with a wealth of knowledge and experience in an NHS research management setting.
